SUMMARY

Software Engineering (Honours) graduate from The University of Queensland (UQ) with a Data Science minor. Progressed through three internship roles at a SaaS company, from UX/UI research to front-end development to AI feature testing, building hands-on experience with data-focused work in Python and SQL alongside cloud infrastructure (AWS, Terraform, Spark) and applied machine learning (NLP, time-series forecasting).

EXPERIENCE

AI Engineer (Internship), Chatstat

Mar 2026 - May 2026

- Tested and evaluated AI-powered features within a SaaS platform, analysing AI workflows, application behaviour, and data flows for reliability and usability.
- Identified and documented software bugs, presenting findings and recommended fixes to the development team and team lead in weekly syncs.

Software Engineer (Internship), Chatstat

Jan 2026 - Mar 2026

- Developed and improved features within a web-based SaaS platform using HTML, CSS, JavaScript, and MobX.
- Collaborated with developers to identify issues and improve product functionality, and contributed to testing and documentation.

UX/UI & Front-End Developer (Internship), Chatstat

Sep 2025 - Jan 2026

- Conducted UX audits of the product and researched competitor tools to identify usability improvements.
- Used Figma, Canva, and Adobe Illustrator to communicate design recommendations to the development team.

Developer (Internship), UQ Bono Project, The University of Queensland

Dec 2025 - Mar 2026

- Selected through a competitive process to join a student-led software development team; participated in team planning and contributed to early-stage data preparation.

Mathematics and Science Tutor, Alchemy Academy

Jul 2022 - Present

- Delivered 447+ one-on-one tutoring lessons for secondary students since Jul 2022, building personalised lessons and supporting exam preparation.

PROJECTS

FutureVest - Stock Analysis Platform (Full-stack data project: React, TypeScript, Chart.js)

Designed stock search, screening, peer-comparison, and valuation-model pages for a full-stack equities analysis platform (6-person team project).

Saliva Pathogen Detection API (Cloud/backend project: Python, Flask, AWS ECS Fargate/SQS/RDS, Terraform)

Engineered a two-service Flask/SQS microservice on ECS Fargate with RDS Postgres persistence and Terraform-provisioned autoscaling.

Football Analytics on GCP (Big-data/cloud project: Apache Spark, Hadoop/HDFS, Docker, GCP)

Deployed a multi-node Spark/Hadoop cluster on GCP to run big-data analytics queries over approximately 600MB of football statistics.

Queensland Unemployment Forecasting (Data science/forecasting project: Python, statsmodels, TensorFlow)

Built a time-series forecasting pipeline (STL decomposition, ARIMA, LSTM) plus a SARIMAX policy-scenario analysis using real ABS/RBA economic data.

Movie Popularity vs. Quality - IMDb Data Analysis (Data science/statistics project: Python, pandas, statsmodels, scikit-learn)

Analysed 5,043 IMDb films to test whether popularity predicts quality; popularity remained a significant predictor ($R^2 = 0.37$) after controlling for genre, decade, and runtime, via correlation, regression, clustering, and PCA.

Learning Website Application (Full-stack web project: Python, Django)

Designed a role-based course platform with Google/GitHub OAuth, QR-code course access, and a quiz engine with tested API-driven progress tracking.

Additional project code, including cloud, full-stack, and data analysis work, at github.com/rajanya-paul-choudhury

SKILLS

Data & Machine Learning: pandas, scikit-learn, TensorFlow/Keras, statsmodels, NLP, time-series forecasting

Cloud & Infrastructure: AWS (ECS, SQS, RDS), Terraform, Docker, Google Cloud Platform (GCP), Apache Spark/Hadoop

Languages: Python, JavaScript, TypeScript, SQL, Java

Web & Backend: React, React Native, Django, Flask, REST APIs

Tools: Git, Figma

EDUCATION

Bachelor of Engineering (Honours), Software Engineering - Data Science minor

Feb 2022 - Jul 2026

The University of Queensland (UQ)

Activities: UQ Computing Science Club, UQ Ladies in Technology (LIT), UQ Women's Support Association

Honours thesis (consumer trust in AI in healthcare) - awarded 7/7; selected for publication in IJMI.

LEADERSHIP & ADDITIONAL EXPERIENCE

- Event Manager, UQ Women's Support Association - 2024

Additional experience: Mathematics Tutor, Ezy Math Tutoring (2022 - 2023); Psychology Tutor, Superprof (2022 - 2023);

Administrative Officer, COVAX Australia (2021 - 2022); Food & Beverage Attendant, Bangkok Milton Thai Restaurant (2024 - 2025)

CERTIFICATIONS

SQL for Data Science - Simplilearn (2026); Deloitte Cyber Virtual Experience Program - Forage (2026); Unlocking Your Employability (Employ101x) - UQx / edX (2026)
