SUMMARY

Software Engineering graduate (University of Queensland, Honours, Data Science minor) with hands-on industry experience across front-end development, software engineering, and AI feature testing at a SaaS company. Comfortable across the stack in Python, JavaScript/TypeScript, and SQL, with project experience in cloud infrastructure (AWS, Terraform, Spark) and applied machine learning (NLP, time-series forecasting).

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java

Web & Backend: React, React Native, Django, Flask, REST APIs

Data & Machine Learning: pandas, scikit-learn, TensorFlow/Keras, statsmodels, NLP, time-series forecasting

Cloud & Infrastructure: AWS (ECS, SQS, RDS), Terraform, Docker, Google Cloud Platform, Apache Spark/Hadoop

Tools: Git, Figma

EXPERIENCE

AI Engineer (Internship) — Chatstat

Mar 2026 – May 2026

- Tested and evaluated AI-powered features within a SaaS platform, analysing AI workflows, application behaviour, and data flows for reliability and usability.
- Worked with development teams to investigate feature performance and user experience.

Software Engineer (Internship) — Chatstat

Jan 2026 – Mar 2026

- Developed and improved features within a web-based SaaS platform, working across HTML, CSS, JavaScript, MobX, and modern front-end technologies.
- Collaborated with developers to identify issues and improve product functionality; participated in testing and documentation.

UX/UI & Front-End Developer (Internship) — Chatstat

Sep 2025 – Jan 2026

- Conducted UX audits of the product and researched competitor tools to identify usability improvements.
- Used Figma, Canva, and Adobe Illustrator to communicate design recommendations to the development team.

Developer (Internship) — UQ Bono Project, The University of Queensland

Dec 2025 – Mar 2026

- Selected to join a student software development team, building a real-world software project collaboratively.

Mathematics and Science Tutor — Alchemy Academy

Jul 2022 – Present

- One-on-one tutoring for secondary students, building personalised lessons and supporting exam preparation.

Additional experience: Event Manager, UQ Women's Support Association (2024) · Mathematics Tutor, Ezy Math Tutoring (2022–2023) · Psychology Tutor, Superprof (2022–2023) · Administrative Officer, COVAX Australia (2021–2022) · Food & Beverage Attendant, Bangkok Milton Thai Restaurant (2024–2025)

PROJECTS

FutureVest — Stock Analysis Platform — React, TypeScript, Chart.js

Built stock search, screening, peer-comparison, and valuation-model pages for a full-stack equities analysis platform (6-person team project).

Saliva Pathogen Detection API — Python, Flask, AWS (ECS Fargate, SQS, RDS), Terraform

Built and deployed a cloud-native microservice for asynchronous, image-based pathogen detection, with autoscaling AWS infrastructure provisioned via Terraform.

Football Analytics on GCP — Apache Spark, Hadoop (HDFS), Docker, Google Cloud Platform

Deployed a multi-node Spark/Hadoop cluster on GCP to run big-data analytics queries over ~600MB of football statistics.

Queensland Unemployment Forecasting — Python, statsmodels, TensorFlow

Time-series forecasting pipeline combining STR decomposition, ARIMA, and an LSTM neural network, plus a SARIMAX policy-scenario analysis using real ABS/RBA economic data.

BBC News Text Classification — Python, scikit-learn, NLTK

Bag-of-Words NLP pipeline with two Logistic Regression models predicting news category and broader theme, with full evaluation and coefficient analysis.

Learning Website Application — Python, Django

Role-based learning management system with dashboards for admins, educators, and learners, including a quiz system and subscription management.

More projects, including cloud, full-stack, and machine learning work, at github.com/rajanya-paul-choudhury

EDUCATION

Bachelor of Engineering (Honours), Software Engineering — Data Science minor — The University of Queensland

Feb 2022 – Jul 2026

Activities: UQ Computing Science Club · UQ LIT (Ladies in Technology) · UQ Women's Support Association

CERTIFICATIONS

- SQL for Data Science — Simplilearn (2026)
- Deloitte Cyber Virtual Experience Program — Forage (2026)
- Unlocking Your Employability (Employ101x) — UQx / edX (2026)
